RESPONSE

Seattle, Washington 98101

October 4, 2005

TO THE COMMISSIONER FOR PATENTS:

The following response is submitted to the Office Action mailed July 8, 2005. Currently Claims 20, 22 and 25-38 are pending and stand rejected. These claims have been rejected under the judicially created doctrine of obviousness type double patenting based on US Patents 5,800,385, 5,858,017, 5,860,950 and 6,261,279. In addition, these claims have been provisionally rejected under the judicially created doctrine of obviousness type double patenting based on copending US Patent Applications 10/138,192, 10/138,193, 10/288,997, 10/630,626 and 10/674,290.

In response, Applicants submit a terminal disclaimer based on each of the above cited patents and each of the above cited patent applications, except for US 10/630,626. Applicants submit that the rejection based on the patents and applications that are the subject of this disclaimer has thus been overcome.

OMEROS CORPORATION
1420 Fifth Avenue
Suite 2600
Seattle, Washington 98101
206.623.4688

With respect to the rejection based on commonly assigned US 10/630,626 (the '626 Application), this application discloses and claims ophthalmologic irrigation solutions including combinations of anti-inflammatory/pain, mydriatic and/or intraocular pressure reducing agents. Applicants note that the '626 Application has an effective filing date of July 30, 2002 (the filing date of US Provisional Patent Application No. 60/399,899 from which priority is claimed), and as such the '626 Application cannot be prior art to the instant application, which was filed April 20, 2001 and has a still earlier effective filing date. This rejection should thus be withdrawn.

In view of the above remarks and the enclosed terminal disclaimer, passage of the application inclusive of Claims 20, 22 and 25-38 is respectfully requested.

Respectfully Submitted,

OMEROS CORPORATION
